No woman can  
ever be too rich  
or too thin...  
❧❧❧

Dear reader and valued client.

It has been an exciting August for us here at the centre. Dr Jenni has been working half days and is quite booked, so if you intend visiting Dr Jenni book soon. It is great to be busier and see all our clients.

Our latest member to join the team is **Elaine McMurray** who is a registered **Dietician**. She studied at Pretoria University and has rooms in Alberton. She will be consulting on Wednesdays from 9am to 5pm from the 6<sup>th</sup> of October 2010 at The Aesthetics Centre. Welcome Elaine.

Last Monday Dr Jenni was interviewed on Radio Lotus, by Abigail Naidoo between 7 and 8pm. The aim was to showcase Lipolite, but callers into the show asked a whole range of questions relating to anti-ageing. Those of us who were listening were quite proud that it was our Jenni who was chosen to be interviewed.

The last but biggest news for our clients, is that we have placed the order for a new laser called **Candela V-Beam Pulsed Dye Laser System**. We are expecting delivery in 6 weeks time.

**Our Dedicated Team:** Dr. Jenni Irvine, Dr. Dominique Myburgh, Dr. Gayle O' Kelly, Sr. Lucy Verbeeck, Kim More, Denise Baillie, Julia Magampa, Julie Wright and Alouisa van Wyk and soon to join us Elaine McMurray

*the Candela V Beam will be able to treat.....*

Candela's V beam Perfecta can do it all: from rejuvenation by correcting red and brown skin discoloration, to eliminating virtually all vascular and pigmented lesions. The Perfecta features advanced micro-pulse technology, multiple hand pieces for treating various spot sizes, and our patented Dynamic Cooling Device™ (DCD™) cooling system, which all but eliminates patient downtime by preventing purpura, or bruising.

For more information visit [www.candelalaser.com](http://www.candelalaser.com)
