What's your company's unique selling point?

We were one of the first clinics in South Africa to offer laser lipolysis, and have extensive experience in this field.

What has been your best-selling product/treatment?

Our best selling treatment has been our laser lipolysis which has revolutionised how we can remove fat. This procedure is done under local anaesthetic. It is safe and delivers fantastic results. The patient is able to go home the same day as the treatment and back to work within 24 hours. Our Fraxel® dual laser gives amazing results in skin resurfacing, tightening and pigmentation treatment and is our second best-selling treatment. We also offer top of the range laser treatments for both aesthetic and dermatological skin conditions.

What makes a great spa/salon experience?

I think the quality of the staff and treatments is very important. Our staff members are highly qualified in their respective fields and able to deliver the desired results.

Which products have you chosen to use in your business, and why?

We stock and use Neostrata and IS clinical homecare products as they are well-researched and offer effective solutions.
